Peru, PPP investment opportunities

Peru offers excellent conditions for foreign investment within a wide variety of sectors. Our solid macroeconomic fundamentals have allowed us to be rated as an investment-grade country and positioned Peru as a leader of economic growth within the region (average GDP growth 2000-2016 of +5.0% per year). GDP growth is forecast to continue, with Peru among Latin America's most robust economies

For more than two decades, Peruvian economic policy has focused on promoting private investment in public infrastructure projects; policy that has transcended governments. Thus, Peru encourages and supports foreign investment through a friendly, stable and predictable legal framework, principles of transparency, free competition, and constant financial innovation.

PROINVERSION is the entity in charge of PPP project design and promotion, with a large project pipeline (currently more than 60 projects) valued at more than US\$ 24 billion. The long-term infrastructure gap in Peru is estimated at around US\$ 160 billion; hence, investment opportunities will prevail in the mid and long term

PROINVERSION and the Embassy of Peru to Switzerland and Liechtenstein are pleased to invite you to the Road Show -Zurich 2018 "Peru: Investment Opportunities in Infrastructure and Public Services" showcasing the highest profile projects in PROINVERSION's portfolio, in sectors such as Transport, Telecom, Energy, Mining, Water & Sanitation, Health and Education. Alberto Nécco, Executive Director at the Private Investment Promotion Agency of Peru, will be the keynote speaker
