

EMBASSY OF PERU
TO SWITZERLAND

THE PERUVIAN GASTRONOMY

The Embassy of Peru in Switzerland is pleased to present a new section in its website dedicated to Peruvian gastronomy, which includes a [directory](#) of restaurants, food and beverage distributors as well as catering services. The objective is to promote our gastronomy and support entrepreneurs in this sector.

Peru, a country with a rich and diverse cultural tradition, with important natural resources and access to a mega biodiversity, has developed a renowned gastronomy for its quality, variety and flavor.

In Switzerland, entrepreneurs who bet on Peruvian gastronomy are a community that promotes it with great enthusiasm and creativity. Gastronomy goes hand by hand with the use of products of Peruvian origin, such as lucuma, mango, passion fruit, organic banana, green chili, asparagus, Pisco or the famous "Superfoods". That is the reason why you will find in this section, a network of food products suppliers and catering companies as well as a section dedicated to information and activities in the gastronomy sector.

With this webpage, the user can choose a restaurant to enjoy the Peruvian cuisine and a good Pisco sour, the flagship drink; or, eventually, purchase ingredients to prepare food at home.

The directories will be kept up-to-date, for which the interested company may request its inclusion or changes by filling the attached [form](#).

Disclaimer: The activities of the restaurants and companies included in these directories are the sole responsibility of their owners or legal representatives.
